

PROTHOR™

THE PROTECTOR

NOW WITH **5 YEARS** GUARANTEED PROTECTION

The Prothor Termite Defence Zone™

The Professional Standard for Protecting Against Termites

The Threat - Termites are a serious problem that can outsmart many types of termite control products.

The Protector - Prothor is different. When applied to soil at recommended concentrations it is undetectable by termites so they tunnel through it. After termites come into contact with treated soil they die.

The Prothor Viral Effect - When termites unknowingly tunnel through Prothor treated soil, they accumulate Prothor on the outside of their bodies. It does not kill them immediately. The delayed toxicity allows contaminated termites to interact with non-exposed termite nestmates infecting and killing all in their path.

The Defence Shield - Prothor's unique 'Hysteretic Binding' ensures better dispersion of the Prothor through the soil when it is applied. It then grips tightly to the soil particles which ensures the Prothor Termite Defence Shield keeps on protecting.

The Environment - Prothor is safer for the environment when compared to many other soil termiticides. Whilst deadly to termites, Prothor is odourless and safer for use around homes.

PROTHOR - THE MOST COST EFFECTIVE NON-REPELLENT TERMITICIDE IN THE MARKET NOW COMES WITH 5 YEARS GUARANTEED PROTECTION.
